art luna salon

Art Luna

Highlights, \$200 and up
2116 Main St., Santa Monica
310-450-7168

Luna works in a crisp white shirt, which led us to ask: "Is it practical to play with hair color while wearing that?" Luna assured us that he was "very precise." And after a few hours spent processing our hair in his garden, we had to agree. He replaced our plum-red shade with a summery strawberry, marked with golden glints that Luna painted a few painstaking strands at a time. Before we left, he examined us outside at different angles to make sure the color was perfect. And as we shamelessly checked ourselves out in every storefront window for the rest of the day, we marveled that such a methodical process could leave us with a color so beautifully natural.
